REFERENCE NOTES

PROPERTY LINES:-
 The publishers have made an extensive research to determine property bounds, however in some instances it has been impossible to secure definite locations for property lines. In such cases an approximate boundary has been indicated by a long dash line rather than the usual solid line.

TINTS:-
 Generally are used to more clearly indicate the ownership of the various tracts of land; however in the case of subdivisions which do not have owners names on the lots, one tint is used to indicate the extent of the subdivision.

SUBDIVISIONS:-
 Officially Recorded Subdivisions are indicated in the following manner:
 Name of Subdivision *BEACH MANOR*
 Official File Number *MAP NO. 1649*
 Boundaries of existing subdivisions are indicated by a solid heavy black line, and further set off by a brown band. In cases where a subdivision boundary does not follow an existing property line, it is shown with a black heavy dash line.
 The File Numbers given are those under which the original plan is filed in the respective Town Clerk's Office.
